Hannah
FREELANCE EXPERT

Data Scientist | Digital Health Expert | DEI Advocate or Data Science Consultant

"Curious mind that loves to discover the story behind data. I am dedicated to improving health outcomes and increasing AI fairness to ensure equitable and responsible use of machine learning in healthcare.

Holding a Ph.D. in sociology, I have a strong statistical background and utilize my understanding of human behavior and societal patterns to offer insights that pure techies might miss.

As a former founding team member of a digital health startup, I significantly contributed to the development of our data strategy and analytics framework, utilizing my interdisciplinary expertise to drive innovation and implement effective solutions in the digital health space.

My expertise as a data science consultant lies in unveiling patterns and trends that guide strategic decisions, presented through clear communication and engaging reports."
